EDUCATION

2021 - 2025

Technological Institute of the Philippines – Quezon City

- Computer Engineering, elective in Data Science

CAREER OBJECTIVE

Passionate about leveraging my skills in programming, data science, AI, and engineering to build groundbreaking and innovative technologies. Actively participates in hackathons and community events, while continuously exploring and staying updated with emerging technologies.

SKILLS

- Programming Languages: Python, C#, JavaScript, TypeScript, HTML, CSS
- Frameworks & Libraries: NumPy, Pandas, Scikit-learn, PyTorch, TensorFlow, Qiskit, Git, LangChain, LangGraph, Selenium, YOLO, FastAPI, Locust, React
- Tools & Technologies: Node.js, Unity, Git, MySQL, Nginx, SAP, AWS, Docker, OpenAI, Ngrok, Cloudflare, GitHub, Grafana, Prometheus, Postman, Cloudflare, Terraform, Redis
- Technical Skills: Agentic AI, RAG, ML, Computer Vision, Game Dev, Digital Twin, IoT Systems, Deep Learning, Artificial Intelligence, Web Automation, Gen AI, DevOps, CI/CD, REST, WebSockets

ACHIEVEMENTS

- Microsoft Imagine Cup PH 2023 – 3rd Place
- Adviser's Choice Award, CPE Design Project Exhibit
- 4th Best Design Project, by Program Chair, CPE Design Project Exhibit

EXPERIENCE

AI Software Engineer

Radenta Technologies — Oct 2025 - Present

- Designed and built a proof-of-concept (POC) in 1 month, securing client buy-in and establishing the technical foundation for a full-scale enterprise AI solution.
- Serving as a Software and DevOps Engineer architecting an AI-driven platform using Python, and AWS, designing end-to-end cloud infrastructure and real-time event workflows targeted to scale to 700,000+ users on a 4-month roadmap.
- Gathered complex business requirements from enterprise clients and partners, translating high-level business needs into scalable, high-performing technical architectures.
- Represented the company across key industry events, presenting custom AI solutions directly to ePLDT VITRO leadership, participating in the Claude For Channels (CFC) Camp at AWS, manning the sponsor booth at PHAPi, attending the Axis Communications Technology Showcase, and engaging actively with AAP and hackathons.

Software Developer Intern

Lightweight Solutions — Mar 2025 - Apr 2025

- Engineered a multi-agent AI chatbot POC in 6 weeks using Streamlit, LangChain, and LangGraph to enable contextual document search and QA.
- Evaluated cloud LLM trade-offs, benchmarking multiple model endpoints across cost, latency, and response quality to select the optimal enterprise configuration.
- Architected specialized agents for document parsing, vector retrieval (RAG), and response synthesis, delivering a fully functional prototype and technical foundation for future deployment.
